Step by step

We're here for you at every step of the process.
If you get stuck, send us a note at support@room.com.
We'll get through this together.

Welcome to ROOM.

Something big is about to happen. This is more than just a personal space for the open office. You're building a room to breathe, think big, and dream up what's next. All you need is one tool, and it's already in your hands.

You can rest easy knowing that the soundproofing materials in this booth are made from more than 1,000 recycled plastic bottles. It's our way of doing more by using less.

Thank you for being a part of our community. We're so happy you're here. **Now, let's get to work.**

An inside look

01 Sound insulation
1.6" sound insulation made from recycled materials to tune out the noise.

02 Motion sensor
Smart sensor activates the fans and the LED light, helping you stay energy efficient.

03 Built-in desk
31.5" wide desk and magnetic board give you ample space for your big ideas and your big plans.

04 Power outlets
Two outlets keep you powered up for every charged work session.

05 LED light
Overhead LED light strip ensures bright ideas don't stay in the dark.

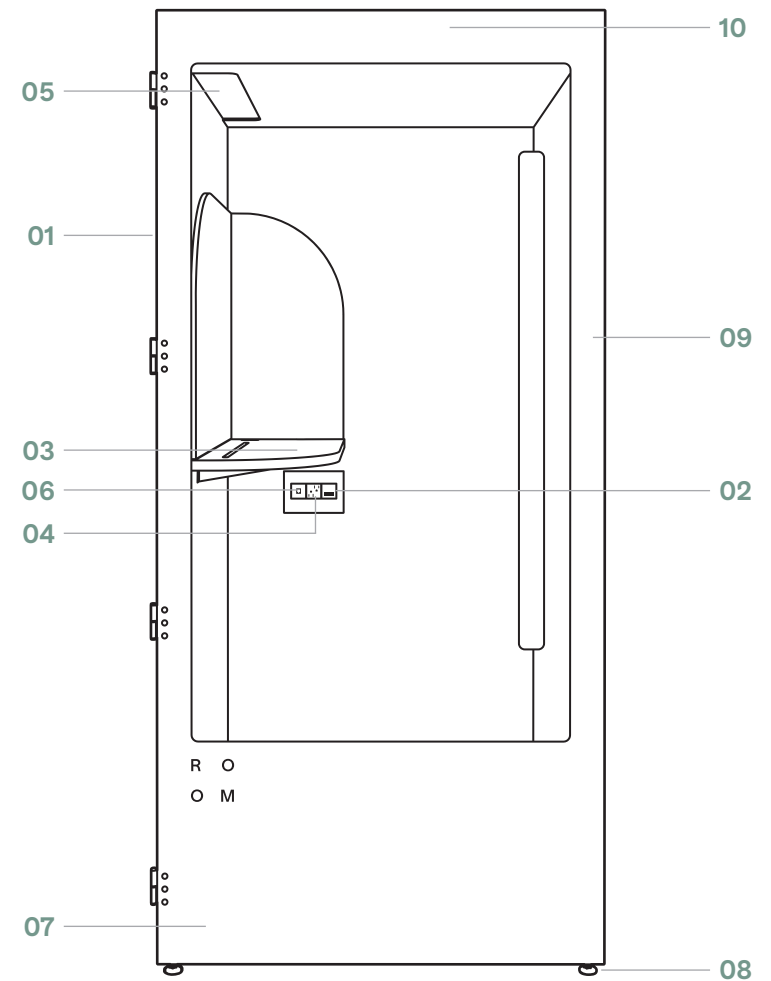

06 Ethernet port
Available as an add-on, the ethernet port, compatible with phone cords, ensures you never miss a connection.

07 Airflow inlet
Discreet inlet, removable for easy cleaning, optimizes airflow.

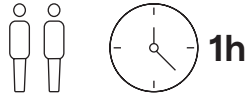

08 Leveling feet
Adjustable feet compensate for uneven surfaces, so everyone stays level-headed.

09 Magnetic door
Acrylic door with magnetic seal minimizes noise and keeps office banter out.

10 Ceiling fans
Two ultra-quiet fans keep you cool under pressure.

Make room for more

Congrats. You just built a phone booth with your bare hands. From what we know, not many people in the world can say the same. We hope you're feeling as proud as we are. **A few things before you go:**

Keep this manual.

We designed our booth to be flexible, so whether you're switching floors or moving into a new building, you can take the booth wherever you go. This manual will come in handy when you want to disassemble the booth and put it back together in your new office, so make sure to keep it in a safe place.

Be mindful of the power cord.

Ten feet of electricity keeps you powered up and ensures room to move your booth around the office. But, that power cord is long. To prevent a trip hazard, make sure the power cord is kept free from walkways and properly wrapped behind the booth. If more than two feet of the cord is exposed, cable drops should be used to keep the cord off the floor.

Recycle the packaging.

We care about the environment, and we know you feel the same. After all, that's one of the great things that brought us together. Our packaging was designed to be flattened so it's easy to recycle. Together, we can make a little more room for the environment.
